

## Instruction sheet for Tribute Ashes Pod & Frame

The Pod is a stylish and innovative ashes container, to which a picture frame is attached to create a discreet and individual memorial. With its smoothly curving lines and dark matte textured finish, the ashes Pod is pleasing to the eye, but barely noticeable behind the picture frame it supports.

There are two Pod sizes (240 - adult) and (67 - token/split ashes).

An appropriately sized picture frames is supplied with each pod size..

	<u>240</u>	<u>67</u>
Pod capacity:	240 cubic centimeters	67 cubic inches
Pod size:	12½"high x 6"deep x 9¼"wide	9"high x 4¼"deep x 6"wide
Frame size:	18½" x 16½" (max)	15" x 13¼" (max)
Photo size (in mount):	10" x 8"	7" x 5"

1. Ashes are inserted into the Pod, and secured, via a threaded bung underneath.

2. The frame is attached to the Pod using a practical and easy to use magnetic system which is simple to set-up, using the Pod's locating pin and the alignment grid on the back of the frame.

3. The Frame can be located in a variety of positions at or above the level of the Pod base in either portrait or landscape mode.

4. Once the locating pin is aligned to the grid at your chosen position, simply allow the magnetic face of the Pod to attach firmly to the frame back.

The Pod's magnetic force is quite strong – sufficient to securely support a large frame.
